1. 1: Cardiovascular Sciences

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date: 01-08-2012

The NHLBI Division of Cardiovascular Sciences (DCVS) plans and directs research grant, contract, and training programs to support basic, clinical, population, and health services research on the causes, prevention, and treatment of cardiovascular diseases. These programs encompass institute and investigator-initiated basic research, targeted research, specialized centers and clinic ...

2. 2: Lung Diseases

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date: 01-08-2012

The NHLBI Division of Lung Diseases (DLD) maintains surveillance over developments in pulmonary research and assesses the Nation's need for research on the causes, prevention, diagnosis, and treatment of pulmonary diseases. Also within the purview of the Division are: technology development, application of research findings, and research training and career development in pulmonary ...

3. 3: Blood Diseases and Resources

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date: 01-08-2012

The NHLBI Division of Blood Diseases and Resources (DBDR) plans and directs research and research training and career development programs, on the causes, prevention, and treatment of nonmalignant blood diseases, including anemias, sickle cell disease, and thalassemia; premalignant processes such as myelodysplasia and myeloproliferative disorders; hemophilia and other abnormalities ...

4. 16: NATIONAL HUMAN GENOME RESEARCH INSTITUTE (NHGRI)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date: 01-08-2012

The successful completion of the HGP in 2003 set the stage for making use of the immense potential inherent in knowledge of the complete DNA sequence of the human genome to be applied for the improvement of human health and well-being. In an effort to outline a path forward, the Vision Document (Nature 422,835-847 (2003)) broadly outlined three areas that need to be addressed: (1) ...

5. 1: Technology and Methods Development

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date:
01-08-2012

Technology development in DNA sequencing and genotyping are examples of activities that have changed the nature of what scientific research questions are practical to address, have enabled new approaches, and have potentiated the development of new community resource data sets. Many areas of critical importance to the realization of the genomics-based vision for biomedical research ...

6. [2: Bioinformatics](#)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date:
01-08-2012

Genome databases are essential resources for the biological and biomedical research communities. The creation and maintenance of effective databases are as important a component of research funding as data generation. The NHGRI has been a primary source of support for several major genetics/genomics-oriented databases and will continue to foster technology improvements to develop effective methods ...

7. [3: Computational Biology](#)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date:
01-08-2012

The NHGRI has supported the generation of many large-scale genomic data sets such as genome sequence, haplotype maps, transcriptome measurements, protein interactions, and functional elements. NHGRI encourages the development of new computational methods and tools to analyze these and other large datasets, and to extract useful biological information from them. Where possible, exis ...

8. [4: Population Genomics](#)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date:
01-08-2012

This is an emerging discipline that applies genomic technologies, such as genome-wide association testing and sequencing, to population studies to identify gene regions, genes, or variants affecting common etiologically complex conditions and predict individual risk. It also investigates the value of applying genomic methods in clinical care for the diagnosis, treatment, and prevention of complex ...

9. [5: Ethical, Legal and Social Implications](#)

Release Date: 01-24-2011Open Date: 03-05-2011Due Date: 01-08-2012Close Date:
01-08-2012

NHGRI supports studies that examine issues and, where appropriate, develop policy options in the following areas: 1) the translation of genomic information to improved human health; 2) the conduct of genomic research—particularly genome-wide association studies, medical sequencing and clinical studies; 3) intellectual property issues surrounding access to and use of genomic information; 4) the u ...
